EDUCATION

GLA University, Greater Noida

2025 - 2029

Bachelor of Technology in Computer Science & Engineering (Core)

Focusing on core CS fundamentals, system design, and advanced algorithmic problem solving.

TECHNICAL SKILLS

Languages	Python, C, JavaScript (ES6+), HTML/CSS
ML/AI	Scikit-Learn, TensorFlow, Keras, Pandas, NumPy, Reinforcement Learning
Frameworks/Libraries	React.js, Node.js, Express.js, Firebase
Hardware/IoT	Raspberry Pi 5, Arduino UNO, ESP32, Sensor Integration
Tools	Git, GitHub, Linux, Figma, GitLab

PROJECTS & RESEARCH

Anomaly-Based Cyber Attack Detection (ML)

Engineered a machine learning pipeline to identify network intrusions. Focused on feature engineering and classification algorithms to enhance detection accuracy.

BloodLink Pro

Developed a real-time medical SOS network using GPS-based matching (Haversine formula) and Firebase for high-speed data synchronization.

Orange Pigeon (AI/IoT)

An AI-powered deterrent system utilizing Raspberry Pi 5 and computer vision for real-time pest detection and response.

HACKATHONS & EXHIBITIONS

- Participated in 2 National Level Hackathons, focusing on IoT and Reinforcement Learning.
- Showcased innovative hardware solutions at a Technical Project Exhibition.
- Participant in Scaler x Meta OpenEnv Hackathon (Reinforcement Learning focus).
- Developed AgroVON 2.0 (Smart Farming Ecosystem) for a GitLab Hackathon submission.
- Proficient in Linux OS management and hardware-to-software bridging.

CORE COMPETENCIES

Data Structures & Algorithms, Internet of Things (IoT), Neural Networks, Full-Stack Development, Real-time Systems.
