CAREER OBJECTIVE:

Driven 3rd-year Computer Science engineering student with a strong foundation in Data Structures, Algorithms, and full-stack web technologies. Passionate about software development and seeking opportunities to leverage skills in C, Java, Python, and JavaScript to build efficient, scalable, and user-centric applications.

EDUCATION

Future University | Bareilly, UP

Bachelor of Technology in Computer Science and Engineering (CSE) | Expected: July 2027

CGPA: 7.5

TECHNICAL SKILLS

Programming Languages: C, Java, Python, JavaScript

Web Technologies: HTML, CSS

Core CS Fundamentals: Data Structures & Algorithms (DSA), DBMS, Object-Oriented Programming (OOP)

Tools & Technologies: VS Code, Git/GitHub, IoT-Software Integration, Python Automation

PROJECTS

AgroVON 2.0 – Smart Farming Ecosystem | Software & Integration Co-Developer

Co-developed a smart-farming solution integrating IoT hardware with custom software for agricultural monitoring.

Assisted in building the software data pipeline for real-time processing and communication between sensors and the UI.

Achievement: Successfully showcased the working prototype at a university exhibition, demonstrating live hardware-to-software data flow.

Orange Pigeon – Automated Deterrent System | Python Developer

Developed an automated system to process live camera feeds and deter pests using Python-based logic. Programmed the core automation scripts to trigger specific audio deterrents based on system inputs. Managed software-side integration, ensuring seamless communication between camera hardware and audio output modules.

ACHIEVEMENTS & EXTRACURRICULAR ACTIVITIES

Technical Presentation: Presented the AgroVON 2.0 prototype to faculty, explaining technical architecture and hardware/software integration in accessible terms.

Collaborative Development: Partnered in team environments to debug, build, and deliver functional prototypes for university-level exhibitions.

Active Coder: Regularly solving problems on platforms like LeetCode/HackerRank to strengthen DSA concepts.
